

## The Fractal Blues

Eric and Adam

Section 1 has begun, and I know where to start  
I can see the Quaker Oats guy, and it goes to my heart  
So maybe this fern leaf will make more sense  
How can I learn at this expense?

Refrain: It's called fractals, fractals, fractals  
don't you see?

It's fractals for you, and fractals for me  
(Name of Fractals Figures) said to share, as long as  
you care  
about fractals...

Section 2 is brand new, It's the dynamics of change  
I see all the graphs with their domain and their range  
I take a peek at Conway's game of life  
And wonder what's causing all this pain and strife

refrain

When we got to three, It dealt with detailed beauty  
And it's getting just a bit confusing you see  
So then onto four now we're flat on the floor  
With Julia and Mandelbrot, we can't take no more

refrain

It's time for section five, and we're barely alive  
We're hurtin' for some chaos answers from Dr. Blyth,  
It's really tough to guess how chaos will behave  
Especially when Karen thinks that Adam's name is  
Dave...

refrain

Section six, it's a brand new mix  
We haven't learned about it so we're in a fix  
We can't think of words, and you can't sing along  
So now it's time to end this ridiculous song

refrain
